## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 9-18 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach an insulation element of the present invention that particularly has a film laminate structure that comprises a film layer with through holes and a second film layer open to vapor diffusion, enclosing a nonwoven layer and/or foam layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US 6,635,329 B1 – teaches an insulation material similar to the present invention but instead of having the first layer to be a film with through holes, uses a net bonded to an imperforated vapor permeable second layer. The Examiner did not find motivation in the art of record to substitute the perforated film for the net layer.

US 4,567,080 – teaches a vapor barrier comprising two vapor-tight layers and a water-absorbing layer interposed there between. The reference does not teach the use of an imperforated vapor permeable film layer.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Norca L. Torres-Velazquez whose telephone number is 571-272-1484. The examiner can normally be reached on Monday-Thursday 8:00-4:00 pm.
